EDUCATION

B.Tech in Computer Science & Telepathic Engineering — Eden Academy (2023 - 2027)
CGPA: 8.7/10 (Earned 3 Stella Stars, 0 Tonitrus Bolts)

Class 12 (Ostanian Board) — Example Junior College (2023)
93.4%

Class 10 (Ostanian Board) — Example Public School (2021)
95.2%

SKILLS

Languages: Python, Java, SQL, Mind-Reading (Native, Passive)
Frameworks & Tools: scikit-learn, PyTorch, LangChain, RAG, FastAPI, React
Databases & DevOps: PostgreSQL, MongoDB, Git, Docker

EXPERIENCE

Machine Learning Intern at Example Analytics Pvt Ltd (May 2025 - Jul 2025)

- Built a churn-prediction baseline to flag suspicious counter-intelligence movement.
- Monitored predictive model metrics via a real-time web dashboard.

PROJECTS

Peanut Price Predictor — Demand Forecasting (Python, scikit-learn, FastAPI)

Forecasted weekly snack demand from historical grocery sales using gradient boosting. Developed automated alerts to notify local merchants when peanut supplies dropped below critical thresholds.

Study Buddy — RAG Over Lecture Notes (Python, LangChain, RAG, PostgreSQL)

Created a document-retrieval agent allowing students to query complex academic texts. Integrated advanced text-matching to supplement passive telepathic learning gaps during history midterms.

PUBLICATIONS & ACHIEVEMENTS

- Forecasting Snack Demand with Gradient Boosting (Under review, Berlint AI Conference)
- Finalist, Ostanian National Youth Hackathon (2025)
- Core Member, Eden Academy AI Club
- Dynamic Duo partner with Bond the Dog (Predictive Analytics Division)
